Variable Power Supply Module

Logic Supply

Low voltage output for digital circuits 2.5V to 6V programmable Voltage Resolution 0.01V Over voltage 3V to 7V programmable threshold 0.1V Resolution 5A Current Short circuit current 7A indefinite (auto recovery) Short circuit duration 0.5% (20% to 80% load change) Load regulation 80mV pk-pk max *Ripple voltage*

Variable Positive Supply

Positive voltage output for analogue circuits Voltage 0 to +24V programmable Resolution 0.01V Current 1.5A max 50mA to 1.5A programmable threshold Over current limit Short circuit current 1.5A Short circuit duration indefinite (auto recovery) 0.1% (20% to 80% load change) Load regulation Ripple voltage 50mV pk-pk max

Variable Negative Supply

Negative voltage output for analogue circuits Voltage 0 to -24V programmable 0.01V Resolution 1.5A max Current Over current limit 50mA to 1.5A programmable threshold Short circuit current 1.5A indefinite (auto recovery) Short circuit duration 0.1% (20% to 80% load change) Load regulation Ripple voltage 50mV pk-pk max

Physical data

Weight Size Power rating Connectors and cables

PC requirements

5kg 295 x 247 x 65mm 150W max power cable, parallel interface cable, logic and ground cables, +V and -V cables (Minimum) System capable of running Windows 95/98 with at least 32MB of RAM and 20MB of free hard disk space ECP/EPP capable parallel port or 16550 serial port

The ABI development team strive continually to improve their products for the benefit of the customer. The specification of current products may therefore vary from that described in this brochure.
